

RNG Production for your **LANDFILL**

Choosing the right partner makes all the difference

Nothing about a landfill is simple - and that includes treating and monetizing your landfill gas. With decades of experience building many of the largest gas processing facilities in the world, our engineering team knows not just how to turn LFG into high quality RNG, they know how to do it quickly, cost effectively, while prioritizing regulatory compliance.

So when you're ready to stop talking about RNG and actually build an RNG project, contact us. No more empty promises or years of waiting. We will finance, design and build your project on time and on budget so you can enjoy steady, reliable revenue.

Well funded, supported by solid management and backed by decades of experience in gas processing, we have been continually improving our designs to maximize RNG production and minimize operating costs. And now we are offering that experience to you.

Contact us today to learn how you can see RNG profit in months not years with our no-nonsense open book partnership approach.

Stop missing out on RNG revenue. We've got the experience and the funding you need to monetize your landfill gas quickly and reliably for maximum project profitability.

- Experts in gas processing
- See profit in months, not years
- No impact on landfill operations
- Regulatory compliance gets priority
- No-nonsense open book partnership
- Fully funded by H.I.G. Capital

- Design & Construction
- Operations & Maintenance
- Field Services
